This format mirrors the actual ICS Form 201 and should fully meet the requirement for the ICS form. Print this to pdf and upload to mission files for each mission. For the maplink, just take a screen shot and paste it into the email. The basic link is for the Mat-Su valley, but moving the map around changes the URL and you may also copy the SARTOPO link into the email, as I showed above. (SAR Mission Kit web site has been updated)

This should help expedite the initial 201 process.

Jim
